**Read the passage below and then answer questions 26 to 38.**

Everybody knew Kara. Among the adults, he was the boy no one wanted his child to associate with because although he looked quite responsible, he was far from that. Whatever he involved himself in frequently left him or his friends hurt or in trouble. His peers, on the hand, could never avoid him because whenever he was with them, he was the centre of attraction and laughter. He could even make his friends laugh at nothing. It was not always his ideas that landed them in trouble but definitely he had some input in it.

It happened that one afternoon, a number of boys were hungry although they had taken their lunch. So, Mula suggested that they could walk to the hillside and eat those wild fruits, no one objected. We half-ran-half-walked to the thickets but promised ourselves not to go too far in a few minutes, the *excited group of friends* were already there. As we started descending on the fruits, one tree at ago, Mula came up with a bright idea. Each of could get his own tree instead of all fighting over the same tree. Instantly, we left, each heading his own way.

We were soon calling one another from a distance like monkeys. The trees had fruits and although we liked them so much, we lacked one another’s company. As we enjoyed the fruits we could hear one another’s laughter from a distance. It was the only thing that kept us together since the search for fruits had created some distance between us.

Then came a shrilled wild cry of a frightened boy I heard others ask who the person could be and what it was but when the same voice came a second time, louder than ever, I got equally frightened and broke into a run, not caring the direction I was heading to. I ran frantically for my life and fell on prickly thorns, tripped on rocks and stumbled on creeping plants but never stopped even once fear of soon being dead and alone!

It was by a miracle that I soon found myself along a path and just ahead of me was Kara in a matter of minutes we were all together except Mula! We realized he could be in grave danger and started calling out his name as loudly as we could but only got the echo from the nearby hills for response. We decided to go back to the bushes in solidarity and look for our lost friend. The search was still scaring and although we kept together, the search bore no fruit. Our voices were soon hoarse from calling Mula’s name and it was not until we felt the cold wind blowing towards the lake that we realized we would soon be rained on. So we gave up the search and decided to run back home for help.

We were running as fast as we could when we saw a group running towards us. It made us run even faster because to us. Mula’s life could still be saved. However, when the group was within reach, we were perplexed to see that the person leading them was none other than Mula!

**Read the passage below and answer questions 39 to 50.**

It is said that we eat to live but others say we live to eat. Whichever way you look at it, what matters is what you eat. We all eat food of course but not all the food we eat is good for our teeth and health of our body. It is also commonly known that foods and sweets are food that can be quite detrimental to the condition of our teeth.

First are the foods that dry your mouth. Saliva acts as the mouth's detergent after meals. it washes away any food particles, acids and plaque so as to prevent tooth decay and enamel erosion. So when its content is reduced in the mouth, the risk of tooth decay and enamel erosion becomes much higher. Foods that dry your mouth include; coffee, alcohol and most energy drinks.

Acid is contained in both healthy and unhealthy foods. Both of them have very effect on then tooth enamel. Acid erodes the enamel leading to a myriad of problems including sensitivity, discoloured teeth and

tooth decay. Such foods include citrus fruits, coffee, tomatoes and alcohol. One can however, mix-up these foods with low acidic foods like vegetables, avocados and nuts to balance out the amount of acid.

The third group of foods are those that stick to your teeth when you chew them. Chewing increases the harm that food and sugar acids do to our teeth. They tend to stay in your mouth for a long time, thus providing nourishment for the bacteria that cause tooth decay. The bacteria end up producing more acid than usual; causing harm to the teeth. Such foods include bread, chewy candy and dried fruits. Dried fruits can be healthy snack but they are also a big culprit in encouraging tooth decay. One should therefore rinse their mouth with plenty of water after eating these foods and try to floss often.

Hard foods form the fourth category of foods you should avoid. Chewing on hard foods like ice cubes, hard candy and unpopped popcorn can damage the enamel and even lead to loss of teeth
